PART
NUMBER:

PRV25

SPECIFICATION SHEET

PRV25 WATER TANK

- Under Tray Tank
- Roto Moulded Polyethylene Tank
- Moulded recess with pump bottle included
- 1/2" tap
- Cap Mounted Breather
- Mount by bolting through 4 x 11mm moulded holes
- Available in Grey and Black
- Approximate Usable Storage - 25 Litres
- Size: L x 470mm, W x 200mm, H x 450mm
- Filling & Fitting Instructions:

Experience the
Poly Difference!

Align mounting flanges on tank with a sturdy surface on your vehicle
i.e chassis rails, mark holes and drill. Fasten using bolts and flat washers.

NB: Do not drill plastic holes larger

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
