

DPRV110 DIESEL TANK

- Under Body Tank
- Roto Moulded Diesel Grade Yellow Polyethylene
- 3/4" Brass Fittings
- 1 1/2" Inlet
- Approximate Usable Storage- 110 Litres
- Size: L x 910mm, W x 800mm, H x 250mm
- Filling & Fitting Instructions:

*Experience the
Poly Difference!*

Align mounting flanges on tank with a sturdy surface on your vehicle ie: chassis rails, mark holes and drill. Fasten using bolts and flat washers.

NB: DO NOT DRILL PLASTIC HOLES LARGER

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
