- Approximate Usable Storage - 35 Litres
- 1/2" BSP Breather Thread
- 3/4" BSP Outlet Thread, 50mm Screw Cap with Air Valve
- Mount Kit includes: Angle Brackets with bolts, 1/2" breather, 1/2" Tap and Reducer
- Size: L x 1400mm, W x 450mm, H x 75mm
- Fitting and Filling Instructions:

*Experience the
Poly Difference!*

Drill and bolt mounting angles supplied to tray or suitable vertical surface at the right width and fix tank to angles using bolts supplied.

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
