- 3/4" BSP Outlet Thread, 50mm Screw Cap with Air Valve
- Mount Kit Optional
- Approximate Usable Storage - 35 Litres
- Size: L x 1400mm, W x 450mm, H x 75mm
- Filling Instructions:

*Experience the
Poly Difference!*

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
