- 2 x 1/2" Poly Fittings
- 1 x 1" Poly Fitting
- Approximate Usable Storage- 53 Litres
- Size: L x 740mm, W x 345mm, H x 220mm
- Filling and Fitting Instructions:

*Experience the
Poly Difference!*

Mount to a sturdy, flat surface on your vehicle.

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
