- 3/4" Brass Fittings & 2" Inlet Cap
- Mount Kit Included
- Approximate Usable Storage- 60 Litres
- Size: L x 600mm, W x 330mm, H x 530mm
- Filling and Fitting Instructions:

Experience the Poly Difference!

Bolt base plate down with ratchet straps underneath, in line with recessed ribs in tank. Fasten using ratchet straps.

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty. We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.
