

DPRV65L-MK DIESEL TANK

- Long Tank
- Roto Moulded Diesel Grade Yellow Polyethylene
- 3/4" Brass Fittings & 2" Inlet Cap
- Mount Kit Included
- Approximate Usable Storage- 60 to 70 Litres
- Size: L x 1200mm, W x 200mm, H x 430mm
- Fitting and Filling Instructions:

*Experience the
Poly Difference!*

Bolt base plate down with ratchet straps underneath, in line with recessed ribs in tank. Fasten using ratchet straps.

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
