PART
NUMBER:

PRV60-MK

SPECIFICATION SHEET

PRV60-MK WATER TANK

- Upright Tank
- Roto Moulded Polyethylene - Food Grade
- 3/4" Brass Fittings & 2" Inlet Cap
- Mount Kit Included
- Pump (Optional)
- Approximate Usable Storage- 60 Litres
- Size: L x 600mm, W x 330mm, H x 530mm
- Filling and Fitting Instructions:

*Experience the
Poly Difference!*

Bolt base plate down with ratchet straps underneath, in line with recessed ribs in tank. Fasten using ratchet straps.

This tank is not to be pressure filled from a hose that is connected from mains pressure to the tank that has a larger flow rate than the breather. Doing so will cause the tank to inflate and split and will void warranty.

We recommend to use plastic/nylon fittings in this tank not brass.

The stated litre capacity is by cubic measurements and is a guide only. Usable litre capacity is determined by the way the tank is mounted.

TANK MUST BE FLUSHED BEFORE INITIAL USE
